

# Company Profile

**Company Name** MarkLogic Corporation

**Product Name** MarkLogic Server, or “MarkLogic”

**Overview** MarkLogic® is the world’s best database for integrating data from silos. MarkLogic is an *operational and transactional* Enterprise NoSQL database platform, and organizations around the world rely on it to integrate their most critical data and build innovative applications on a 360-degree view of that data. MarkLogic makes it easy to get data in and easy to get data out, and it is 100 percent trusted to run critical business operations. Headquartered in Silicon Valley, MarkLogic has offices throughout the U.S., Europe, Asia, and Australia. For more information visit [www.marklogic.com](http://www.marklogic.com).

**Differentiators** MarkLogic is designed to integrate data from silos better, faster, and with less cost. With MarkLogic, you can integrate data and build your 360-degree view up to four times faster than if using a traditional database. And, you do not have to sacrifice any of the enterprise features required for storing and managing mission-critical data.

- **Easy to Get Data In** – Ingest structured and unstructured data *as is* with a flexible data model that adapts to changing data. MarkLogic natively stores JSON, XML, text, geospatial, and semantic triples
- **Easy to Get Data Out** – With an “Ask Anything” Universal Index, you can run lightning fast searches across all of your data. We also provide APIs and other tools to enable fast application development and deployment
- **100% Trusted** – MarkLogic is enterprise ready, having ACID transactions, scalability and elasticity, certified security, high availability and disaster recovery, and other enterprise features required to run your business

**Solutions** MarkLogic is used to integrate data and power a wide variety of mission-critical, highly scalable applications across industries. Some popular solutions include:
